

## Welcome to NetPricing Solutions

Do you contract your travel inventory direct with suppliers?

Do you price your products in advance?

Do you publish prices in brochures?

Is your pricing process hampered by the double loading of data?

Do you have limited capacity to model prices and understand your expected margins before finalising your prices?

Do you struggle to estimate booking costs and margins once you've gone on sale?

If the answer to *any* of the above questions is yes, then you've come to the right place.

# AutoPricer

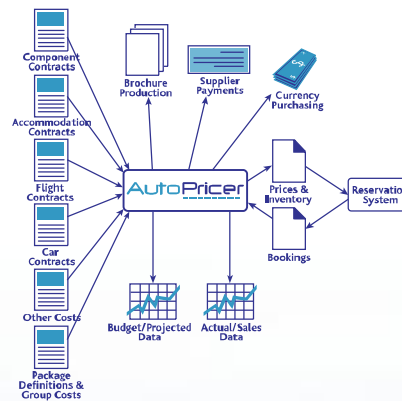

## Introducing AutoPricer

- A modern, integrated contracting and pricing application allowing the loading of costs and the creation and management of prices for:

- Single centre packages,
- Multi centre packages,
- Complex tours,
- Accommodation only,
- Flight only,
- Car only,
- Fly Drive,
- Component only.

- A modular product:

- Core system incorporating all the key pricing functions,
- Four optional 'add on' modules:
  - Remote contracting,
  - Forward booking margin generation,
  - Brochure price panel creation,
  - Late sales.

Holiday Costs Database	Supplement Generation & Management	Forward Booking Margins
Holiday Setup	Margin Evaluation & Reporting	Late Pricing
Basic Price Generation & Management	Brochure Price Panels	Remote Contracting

### What can AutoPricer do?

- Load all contracts for hotels, flights, carhire and components
- Hold all pricing assumptions
- Generate prices and evaluate margins
- Model pricing scenarios
- Output prices to Reservation Systems and Brochure Panels

### Why use a Pricing System?

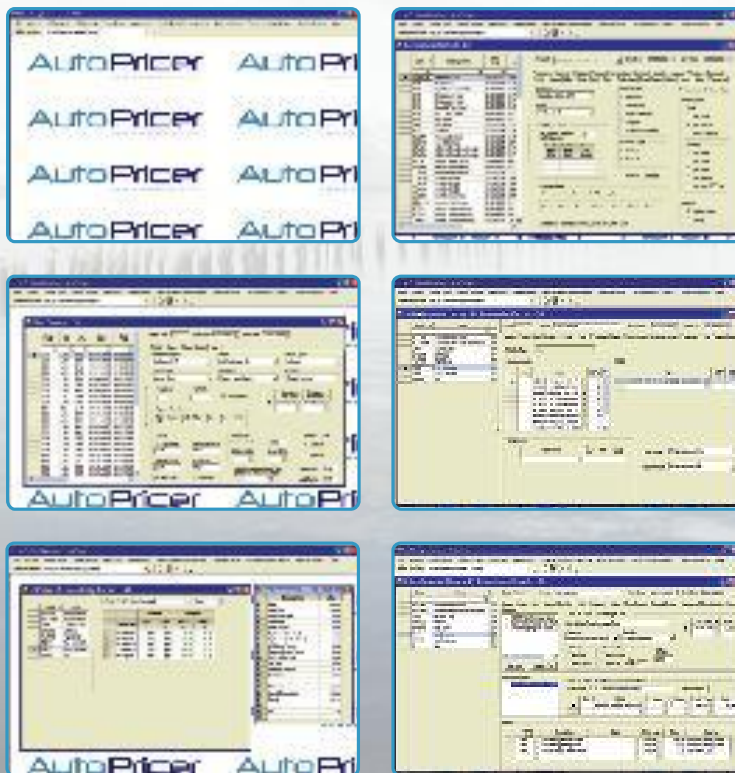

- Tour Operating is a complex business - pricing especially so
- Common issues include:
  - Multiple data entry
  - Diverse systems
  - Lack of modelling capability
  - Limited visibility of margins
  - Time constraints
- Spreadsheets have been the solution of choice for many operators, often exacerbating the situation

### The benefits of a more sophisticated approach...

- Improved data accuracy
- Improved use of resources
- Improved margin management capability

### AutoPricer – a proven solution from a respected and highly experienced team

100 years combined expertise in building, implementing and using Contracting and Pricing systems across the UK Travel Industry has resulted in a solution packed with functionality that can be implemented 'out of the box' in a matter of weeks.

## Why choose NetPricing Solutions as your pricing system provider?

- Designed by a team with unparalleled experience in tour operating within a number of major UK tour operators and with specific hands on experience of using similar tools
- Unrivalled functionality - not available through any other technology supplier
- Flexible commercial structure to suit your financial circumstance and chosen accounting policies
- A proven and demonstrable solution available today
- We price the majority of UK package holidays
- We use modern technology for our application
- We support you - the user - to get the best out of our extensive functionality - not just fix system bugs
- We have an evolving product and our support contract will provide you with regular product updates
- We can offer the minimum implementation risk due to the completeness of our existing product and our tour operating expertise

### About us

NetPricing Solutions was formed in 2004 by some of the UK Travel Industry's leading Pricing and Revenue Management experts. Our objective is to offer affordable advanced pricing and yield management products to the travel industry, placing particular focus on those sectors where products are priced 'in advance'. We believe that our cost structure and modular approach will extend the reach of our system. It will enable tour operators outside of the UK 'Top 5' to gain the benefits that the larger operators have enjoyed for over 10 years.
